

Child & Family Travel Clinic

at Offspring

Dr Shidan Tosif

MBBS (Hons) FRACP
General Paediatrician
Special interest in travel medicine

Now available

BCG Vaccine

for the prevention of **tuberculosis**

BCG vaccination can be given from birth up to the age of 5 years to protect against tuberculosis (TB). It is recommended for babies, infants and young children travelling to countries where tuberculosis is common, including India, China, Vietnam and other countries in Asia, Africa and South America.

Offspring's travel clinic provides specialist paediatric advice for:

- ✓ BCG vaccination (for tuberculosis protection)
- ✓ Malaria prophylaxis
- ✓ Children with chronic disease
- ✓ Immunocompromised children
- ✓ Family holidays, School trips or Gap years

Individualised Care

Our Paediatrician provides specific recommendations that are tailored to your child's age, medical history and destination of travel.

Travel Ready

We have vaccinations for 196+ countries worldwide along with prevention tips, travel-kits and general travel advice.

Child-Friendly

Our clinic is designed for children and their families. Our Paediatrician and Paediatric Nurse are experts in delivering vaccinations to kids.
